Subject Index

Acid–base interactions, 169
Adhesion, 105, 149
Adsorption, 161, 197
Aggregation, 27
Alcohol, 19

Bacteria, 105
Bacterial adhesion, 121, 141, 179
Bacterial physiology, 121

Calcium, 237
Cell aggregation, 213
Cell surface macromolecules, 179
Chloroform, 169
Collision efficiency, 121
Colloidal stability, 3
Colloid stability, 105, 179
Contact angle, 57
Corneal mucus layer, 223
Critical stabilization concentration, 3
Crystal growth, 197

Debye length, 67
DLVO, 197
DLVO forces, 83
DLVO theory, 27, 57, 99, 105, 141, 161, 179

Effective diameters, 19
Ellipsometry, 197
Exopolymers, 141
Extended DLVO, 19, 57
Extended DLVO theory, 3

Flocculation, 47, 57
Fusion, 213

Hexadecane, 169
Human serum albumin, 99
Hydration forces, 3
Hydrophilicity, 57
Hydrophobicity, 57

Immunoassays, 3
Interaction, 77, 223
Interfacial tension, 161

Lewis acid/base, 57
Lipid bilayer, 77
Lipid vesicles, 27, 149

Membrane, 77
Microbial Adhesion, 169
Modified DLVO theory, 27

Non-classical DVLO behaviour, 3
n-Tetradecane–water emulsion, 19

Oil/water interface, 161

Particle suspensions, 47
PEG, 197, 213
Pharmaceutics, 57
Phosphatidylcholine, 161
Phosphatidylserine, 161
Plasma membrane, 237
Poisson–Boltzmann equation, 67
Polymer, 197
Porous media transport, 121
ζ-Potential, 161
Protein, 77, 99, 197
Protein adsorption, 67
Protein solution behavior, 83

Root, 237

Salinity, 237
Sodium, 237
Stability, 19, 47
Steric interactions, 179
Surface charge, 237
Surface free energy, 57
Surface thermodynamics, 121

Tear film, 223

van der Waals forces, 83
Van der Waals interaction, 149
Vesicle, 161
Vessicle interaction, 27

XDLVO theory, 141

Zeta potentials, 19
